About Us

With over 30 years experience in Roof Truss Design and Manufacturing, we at TechniStrut (Pty) Ltd know the importance of proper planning, careful and accurate design and manufacturing as well as punctual delivery of your roofing project. We are involved in every level of the roofing industry, from the smallest alteration roof to the largest residential roof structure, townhouse development and commercial building project.

Founded in 1980, TechniStrut (Pty) Ltd grew to one of the leading roof truss manufacturers in Southern Africa and was awarded the accolade of being one of the Top 5 Roof Truss Manufacturers in South Africa for more than 20 consecutive years.

We hold the highly acclaimed Certificate of Competence (Category A) issued by the Institute for Timber Construction (ITC-SA) which ensures the quality of our manufactured products through regular factory audits.

Using the latest Mitek Industries design software which is based on global standards, we design safe and cost effective roof structures. Our design and manufacturing processes comply with regulations set out by South African National Standard (SANS), National Building Regulation (NHBRC) and the Institute for Timber Construction (ITC-SA). Accurate computer generated structural drawings accompany each delivery to ensure structurally sound installation.

Our experienced consultants and designers can advise and assist you in all aspects of your roofing project, from site measuring before manufacturing to inspection for the mandatory A19 certificate.

Our newly established installation department can provide professional installation on selected projects. We supply a vast range of supplementary roofing products including insulation, roof tiles and roof sheeting from all the major South African brand names.

Our Products & Services

TechniStrut (Pty) Ltd offers a holistic roofing supply solution. While our core business is the manufacture of Timber Roof Trusses, we also supply all the additional material required to install a complete roof. Our products and services include:

Timber Roof Trusses

We have been manufacturing Timber Roof Trusses for more than 30 years. We design and manufacture engineered Timber Roof Trusses for private dwellings, housing developments and commercial buildings.

Roof Tiles

We source our concrete Roof Tiles from leading manufacturers such as Marley, Infraset, Westend, CastCrete and Coverland. TechniStrut also estimates the quantities of roof tiles required for your project based on the detailed truss design.

Roof Sheeting

Choosing the right Roof Sheeting is essential for a lasting end result. TechniStrut supplies all leading Roof Sheeting materials in a range of profiles, including Corrugated Roof Sheeting, IBR Roof Sheeting and Concealed Fix Sheeting in a variety of thickness, finishes and colours.

Finishes

As part of our comprehensive roofing solution, we supply Facia and Barge Boarding, Insulation, and Underlay.

Sundry Materials

Project time-lines are met by delivering all the required sundry materials with the roof trusses. These include:

- Battens
- Purlins
- Bracing
- Nails
- Bolts & Nuts
- Eco Products
- Insulation
- Underlay

Our Process

Customer-Centric Processes

At TechniStrut we place our customers at the centre of everything we do. We are able to make this claim with the utmost integrity, ensuring we constantly strive to set new standards in service delivery, while maintaining our most valuable assets – our relationships with our customers.

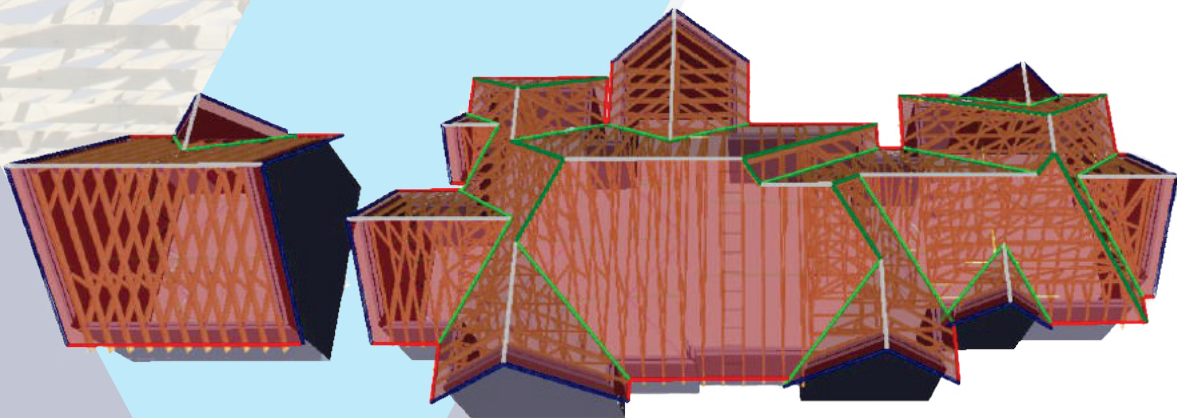

A designated consultant is appointed to each project and will remain the single point of contact throughout the project, from inception to completion.

What's more, the same person is on-call after project completion to follow up on any after sale queries that might occur.

Each TechniStrut consultant will assist you with:

- Advice on the most suitable roof truss solution to suit our clients' needs and budgets;
- Timely provision of design drawings and quotations;
- On-site measurement and liaison with the manufacturing team;
- Overseeing the manufacturing process and providing regular updates to clients.

The TechniStrut team is diligent about meeting agreed delivery and project dates and deadlines.
